

This baler is widely used as baling equipment in food, medicine, hardware, chemical, clothing, postal and other industries. It is suitable for automatic baling and bundling of various sizes of goods, such as carton baling, waste paper baling, parcel letter baling, medicine box baling, light industry baling, hardware tool baling, ceramic product baling, auto parts baling, daily chemical product baling, stationery and sports product baling, equipment baling, etc.

Equipment features:

1. The fully automatic strapping machine is designed for large pallets, heavy and high Cargo.
2. The intelligent touch screen , when the machine fails, the page will record all the failures of the machine since it was started.

Technical parameters:

Product name	Automatic Pallet Strapping Machine
Model	SPR-08
Operating voltage	DC23.6-28.8
Packing size	W<2000mm/H<3000mm
Strap plate size	Core diameter 200/406 mm
Tying speed	Horizontal 40m/min,vertical 60m/min
Size of strap	PP/PET strap,thickness: 0.6-1.3mm width12-19mm
Machine weight	100kg
Chain length	9300mm
Endurance working times	600条
Charging time	around 2.5H
Pallet gap height from floor	75mm
Minimum width of pallets	200mm

Our equipment includes standard machines, customized machines, and models with optional functions.
