

(automatic waste film clamping)

Machine features:

1. The sealing and cutting integrated film wrapping machine is flexible, stable, has a wide range of compatibility, beautiful packaging, and is easy to operate.
2. The preferred film wrapping equipment for increasing product added value and sales. The wrapped products have no extra edges and corners, and the sealing is neat and uniform.

This machine is mainly used for film sealing, cutting and shrink packaging of the outer packaging of various high-end product boxes. It is mainly used for medicine boxes, food boxes, health product boxes, cosmetic boxes, tea boxes, mobile phone boxes, mobile phone battery boxes, mobile power boxes, data cable boxes, MP3\MP4 tablet computers and other products that need film packaging.
