

Machine features:

1. This machine uses advanced photoelectricity and accurate positioning; compared with ordinary automatic side-feed hood sealing and cutting packaging machines or semi-automatic hood sealing and cutting packaging machines, it has the advantages of speed and tight connection.
2. It can work independently or can be connected with the production line to automatically feed, wrap, seal and cut, shrink, cool, and shape, unmanned flow operations.

This machine is suitable for heat shrink packaging of cans, mineral water, beer, glass bottles, beverages and other bottled products without bottom trays (or with bottom trays); at the same time, it can be used in conjunction with a constant-temperature PE shrink furnace to achieve perfect packaging effects.

Parameters:

Cuff type finishing, sealing cutting and shrinking machine	
Machine model	SPR-6030AH
Power Supply	380V、3f、50-60Hz
Power	1.5KW
Product packaging size	L400*W300*H300mm
Dimensions of sealing knife	W:700mm
Packaging speed	6-14pcs/min
Use gas source	6-8kg/cm ³
maximum current	10A
net weight	460kg
Mechanical dimension	L1384xW2716xH1991mm
(The equipment size is standard cuff machine model, which can be customized according to the specific product size.)
