

## Machine features:

1. The upper and lower fans are used to distribute the hot air evenly in the furnace cavity. The high-power cooling motor enhances the cooling effect and the shrinkage effect is beautiful.
2. The reinforced conveying motor ensures smooth transportation, can bear larger weight objects, and the shrink film is not easy to be burned. It is suitable for shrinking various films.

This machine is suitable for heat shrink packaging of large packaging materials such as cartons, floors, and ceramics, or various bottled products such as cans, mineral water, beer, glass bottles, and beverages.

## Parameters:

PE film fully automatic shrinking furnace	
Machine model	SPR-6040LX
Power Supply	380V/50-60Hz
power	24kw
Product packaging size	L1300xW400*H300mm
Packaging speed	25pcs/min
maximum current	60A
net weight	500kg
Shrinkage film type	PVC.POF.PP
Mechanical dimension	L2800*W900*H1690mm
<b>(Note: the size of the equipment is the standard shrinking furnace model, and the model can be customized according to the specific product size.)</b>
