

Machine features:

1. Fully automatic bagging, sealing, cutting, and waste collection are all integrated and unmanned, making packaging easy and worry-free.
2. The equipment uses an integrated sealing knife system, which has high stability and high product aesthetics.

The fully automatic rear edge sealing and shrink packaging machine adopts an integrated sealing knife, with high automation and high working efficiency. It is widely used in mass production industries such as e-cigarettes, printing, color boxes, greeting cards, photo frames, medicine, daily chemicals, cosmetics, etc.

Parameters:

Customized automatic edge sealing and cutting machine	
Machine model	SPR-75
Power Supply	380V/50-60Hz
power	3kw
Product packaging size	W+H<700mm / H<150mm
Dimensions of sealing knife	750mm
Packaging speed	35pcs/min
Use gas source	6-8kg/cm ³
maximum current	10A
net weight	480kg
Mechanical dimension	L1850*W1450*H1400mm
(Note: the equipment size is standard edge sealing model, and the model can be customized according to the specific product size.)	

Machine features:

1. HMI control, easy to operate and understand; data storage function, parameter storage system, fast switching and packaging of different products.
2. The equipment uses imported electrical components to ensure long-term stable operation of the equipment and low failure rate.

Fully automatic rear edge sealing and shrink packaging machine, adopts one-piece sealing knife, high degree of automation and high working efficiency. It is widely used in mass production industries such as e-cigarettes, printing, color boxes, greeting cards, photo frames, medicine, daily chemicals, cosmetics, etc.

Parameters:

Customized automatic edge sealing and cutting machine	
Machine model	SPR-85
Power Supply	380V/50-60Hz
power	3kw
Product packaging size	W+H<800mm / H<150mm
Dimensions of sealing knife	850mm
Packaging speed	35pcs/min
Use gas source	6-8kg/cm ³
maximum current	10A
net weight	480kg
Mechanical dimension	L1850*W1450*H1400mm
(Note: the equipment size is standard edge sealing model, and the model can be customized according to the specific product size.)	

Machine features:

1. Data storage function, parameter storage system, fast switching of different packaging products.
2. The sealing knife itself has an automatic protection function to effectively prevent accidental cutting of the packaged items.

Automatic rear edge sealing and shrink packaging machine adopts one-piece sealing knife, with high automation and high working efficiency. It is widely used in mass production industries such as e-cigarettes, printing, color boxes, greeting cards, photo frames, medicine, daily chemicals, cosmetics, etc.

Parameters:

Customized automatic edge sealing and cutting machine	
Machine model	SPR-95
Power Supply	380V/50-60Hz
power	3kw
Product packaging size	W+H<850mm / H<150mm
Dimensions of sealing knife	900mm
Packaging speed	10-45pcs/min
Use gas source	6-8kg/cm ³
maximum current	10A
net weight	480kg
Mechanical dimension	L1850*W1450*H1400mm
(Note: the equipment size is standard edge sealing model, and the model can be customized according to the specific product size.)
