

This machine is a packaging machine suitable for assembly line operation. It is very suitable for the automated packaging needs of modern enterprises. It plays a very important role in improving packaging efficiency and reducing labor intensity. It is widely used in printing, pallet, papermaking, chemical, food, logistics and other industries.

## Equipment features:

1. The all-metal design has a longer lifespan, is strong and stable, and is suitable for high-intensity work and durable. The metal high-strength body design makes the machine stable.
2. The PLC programmable controller and touch screen are used for unmanned operation, automatic feeding, film application, winding, film cutting, film application, and discharging, automatic fault alarm, etc. The operation is simple, and the performance is stable and durable.

## Technical parameters:

Product name	Automatic Online Pallet Wrapping Machine
Model	SPR-2000
Supply voltage	1P AC220/3P 380V, 50/60 HZ
Overall power	2.5kw
Disk diameter	2000mm
Column height	2500mm
Maximum packing height	2000mm
Maximum packing weight	2000Kg
Drum diameter	76mm
Drum height	550mm
Rotary speed	0-9rap/min
Packaging efficiency	25-30pallets/h
Wrap film	LLDPE stretch film $W \leq 500\text{mm}$
Atmospheric pressure	4-6kg/cm <sup>2</sup>
Gross weight/net weight	1400kg/1300kg

Our equipment includes standard machines, customized machines, and models with optional functions.
