

This machine is used for packaging of products such as foreign trade and domestic sales, food and beverage, papermaking, dyes, plastic chemicals, glass ceramics, electromechanical castings, etc. It can improve logistics efficiency, reduce losses during transportation, and has the advantages of dustproof, moisture-proof, and reduced packaging costs. The whole machine is made of Class A steel and weighs 700 kg. The whole machine is painted, with a beautiful appearance, strong and durable.

Equipment features:

1. Integrated circuit PLC touch screen control, convenient maintenance and better equipment stability.
2. Pre-stretching saves more than 40% of material costs. The film that originally packed one pallet can now pack 3 pallets.
3. Simple and easy to operate: workers can easily learn it in ten minutes with simple training.

Technical parameters:

Product name	Top press pallet wrapping machine
Model	SPR-2517R
Wrapping height	2000mm
Turntable Size	1650mm
Packing Efficiency	25-40PC/H
Top pressure height	500mm-1900mm
Pressure force	30KG (Adjustable)
Pressure drive way	Motor drive
Turntable Speed	0-15rpm(Adjustable frequency)
Turntable Height	87mm
Power/Voltage	1.90kw/AC220V
Control System	PLC
Turntable Weight-bearing	2000kgs (customized)
Machine Weight	750kg
Machine Size	2960*2000*2800mm
Function Option	loading ramp / Weighing/ cut film clamp film

Our equipment includes standard machines, customized machines, and models with optional functions.
