

This machine is used for packaging of products such as foreign trade and domestic sales, food and beverage, papermaking, dyes, plastic chemicals, glass ceramics, electromechanical castings, etc. It can improve logistics efficiency, reduce losses during transportation, and has the advantages of dustproof, moisture-proof, and reduced packaging costs. The whole machine is made of Class A steel and weighs 700 kg. The whole machine is painted, with a beautiful appearance, strong and durable.

Equipment features:

1. Not limited by the size and weight of the packaged object, the packaging speed and efficiency are high
2. The machine is small, convenient for transportation, storage and movement, greatly reducing the footprint of the equipment
3. PLC control, simple and easy to understand, safe to operate, and different winding methods can be set according to user needs

Technical parameters:

Product name	Robotic Pallet Wrapping Machine
Model	SPR-600B
Power Supply	1PAC22050/60hz
Operating Power supply	DC24V
Electricity	120Ah Union
Packable qty	200-300pallets/oneCharging
Running Time	7h/One Charging
Walking Speed	90m/Min
Packing height	2400mm(2800mmCustomizable)
Machine weight	430kg
Machine Size	1610*1253*2785mm
Environment	Humidity<98% Temperature10°C~40°C
Noise	<75db
Optional Accessories	The Remote Control/film cutting device
Packing Material	Width<500mm Outer Diameter<250mm LLDPE Stretch Film

Our equipment includes standard machines, customized machines, and models with optional functions.
