

Machine features:

1. Use non-standard automation technology to fully automatically make bags, seal, arrange film, cut corners for product packaging boxes, and the packaging efficiency is 400-700 pieces/hour.
2. The yield rate reaches 98.5%, making the lines of packaging film cutting high-quality and accurate, and the error of the sealing and cutting line in the middle position does not exceed 2mm.

This machine is mainly used for film sealing, cutting and shrink packaging of the outer packaging of various high-end product boxes, and uses non-standard automation technology to fully automatically film the product packaging boxes. It is mainly used for medicine boxes, food boxes, health product boxes, cosmetic boxes, tea boxes, mobile phone boxes, mobile phone battery boxes, mobile power boxes, data cable boxes, MP3\MP4 tablet computers and other products that need film packaging.

Parameters:

Product name	Fully automatic corner cutting and film wrapping machine
Model	SPR-PZF15.0
Minimum bag size	L100*W80mm*H30mm
Maximum bag size	L380*W280mm*H150mm
packing speed	400-700pcs/H
Mechanical dimension	L2230*W1400*H1750mm
Applicable power supply	AC 220V 50Hz
Applicable air source	0.55~0.7Mpa
Applicable material	POF film (V type double layer film)
