

This machine is mainly used for film sealing, cutting and shrink packaging of the outer packaging of various high-end product boxes, and uses non-standard automation technology to fully automatically film the product packaging boxes. It is mainly used for medicine boxes, food boxes, health product boxes, cosmetic boxes, tea boxes, mobile phone boxes, mobile phone battery boxes, mobile power boxes, data cable boxes, MP3\MP4 tablet computers and other products that need film packaging.

## Parameters:

<b>Product name</b>	<b>Fully automatic high-speed double bag making corneal cutting machine</b>
<b>Model</b>	SPR-PZFGS6.0
Minimum bag size	L100*W65mm*H30mm
Maximum bag size	L250*W210mm*H115mm
packing speed	900-1200pcs/min
Mechanical dimension	L2230*W1400*H1750mm
Applicable power supply	AC 220V 50Hz
Applicable air source	0.55~0.7Mpa
Applicable material	POF film (V type double layer film)

## Machine features:

1. Adopt non-standard automation technology to fully automatically make bags, seal, arrange films, and cut corners for product packaging boxes, with a packaging efficiency of 900-1200 pieces/hour.
2. Add anti-counterfeiting function, the sealing and cutting lines are hidden at the bottom, and the sealing and cutting line error does not exceed 2mm, realizing a process that cannot be prevented by manual work.
