

High configuration, Siemens electronic control, high-end model

This machine is used for packaging of products such as foreign trade and domestic sales, food and beverage, papermaking, dyes, plastic chemicals, glass ceramics, electromechanical castings, etc. It can improve logistics efficiency, reduce losses during transportation, and has the advantages of dustproof, moisture-proof, and reduced packaging costs. The whole machine is made of Class A steel and weighs 700 kg. The whole machine is painted, with a beautiful appearance, strong and durable.

## Equipment features:

1. Integrated circuit PLC touch screen control, convenient maintenance and better equipment stability.
2. Pre-stretching saves more than 40% of material costs. The film that originally packed one pallet can now pack 3 pallets.
3. Simple and easy to operate: workers can easily learn it in ten minutes with simple training.

## Technical parameters:

| Product name             | Pallet Wrapping Machine+Film Grasp and Film Cut   |
|--------------------------|---|
| Model                    | SPR-X100  |
| Wrapping height          | 2350mm  |
| Turntable Size           | 1650mm (customizable)   |
| Packing Efficiency       | 25-40PC/H   |
| Turntable Speed          | 0-15rpm(Adjustable frequency)   |
| Turntable Height         | 87mm  |
| Power/Voltage            | 1.90kw/AC220V   |
| Control System           | PLC   |
| Turntable Weight-bearing | 2000kg  |
| Machine Weight           | 750kg   |
| Machine Size             | 2960*2000*2800mm  |
| Function Option          | loading ramp / Weighing/ cut film clamp film  |
| Packing Material         | Suitable film LLDPE stretching film (15~35 pre-stretching machine winding film (25μ is recommended), with a width of 500mm and an inner diameter of 76mm. |

Our equipment includes standard machines, customized machines, and models with optional functions.
